

Gardens at the Israeli Alzheimer Medical Centre

\ Who you will help

The Israeli Alzheimer Medical Centre, the only one of its kind in Israel, provides specialized services to people with Alzheimer's, dementia and other related diseases. Residents receive physical support - exercise, physiotherapy, art classes - as well as emotional support to cope with the difficulties of degenerative diseases and loss of independence. The centre cares for 190 inpatients and treat hundreds more through outpatient services.

Therapeutic gardening is based on the positive and healing influence attributed to being surrounded by plants, including stress reduction, improved concentration, relaxation and more. For patients with Alzheimer's, special gardens with a variety of plants, abundance of colours and sensory stimuli, allow them to practice and preserve their abilities, problem-solve, enjoy a creative experience and a sense of success.

\ Location

Ramat Gan is a city just east of Tel Aviv.

Gardens at the Israeli Alzheimer Medical Centre

\ Your donation will fund

Experience Garden

The Experience Garden will offer large musical structures for playing and listening, carefully selected plants to stimulate the senses (bright colours, different textures, smells and flavours), a decorative pool and digital media pillars.

Total Project Cost: \$100,000

Garden of Nostalgia

The Garden of Nostalgia will exhibit 'objects of the past', to stimulate cognitive memory and reminiscence, as well as large planter beds accessible for those in wheelchairs, a funnel waterfall, rest areas, and a taboon oven (clay firepit).

Total Project Cost: \$100,000
